

Munja AI

The AI teacher inside the EduSoulX tablet.

Munja AI answers every student's doubt from the school syllabus. It also prepares notes, lessons and question papers for teachers.

for teachers

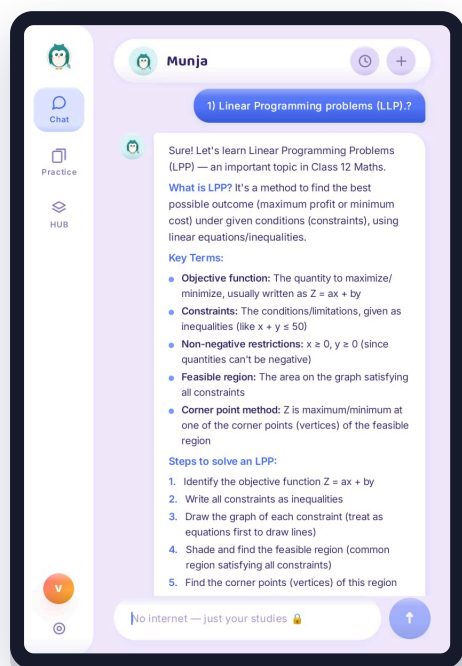

for students

Class	1 to 12
Board	State Board and CBSE
Language	English
Also for	NEET, JEE, MHT-CET

A teacher for every student, at any time

Students study with Munja AI on the tablet. The answers come from the school syllabus, not from the open internet.

Chat

Ask any doubt and get the answer from your own syllabus

- ✓ Explains each concept simply, step by step.
- ✓ Follows the student's own class and board.
- ✓ Helps with doubts after school, at home.
- ✓ A focused space. The screen says: "No internet, just your studies."

Three more ways to study

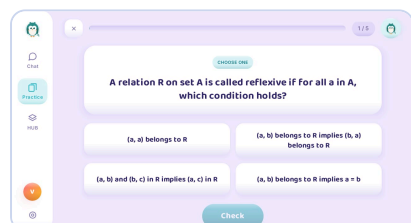

Practice, Mind Maps and Flash Cards are made from the same syllabus chapter. The student picks a topic and starts.

Also for competitive exams, along with school study

NEET

JEE

MHT-CET

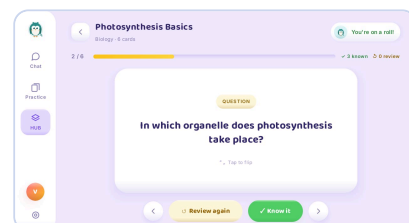

Practice

Practice questions for each chapter. The student taps Check and the answer is checked on the spot.

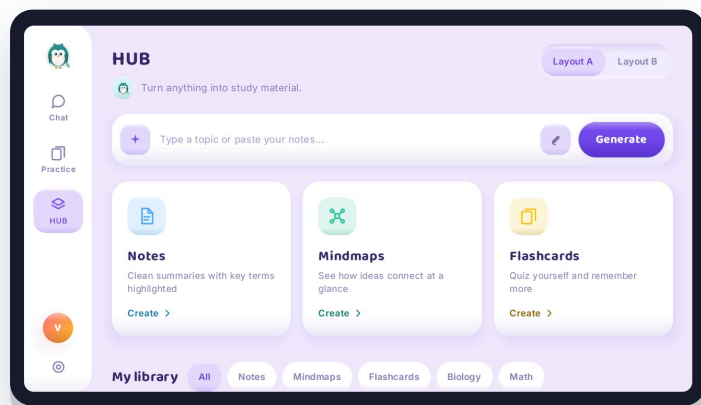

Mind Maps

A whole chapter on one screen, made automatically for quick revision.

Flash Cards

Short question and answer cards. The student marks "Know it" or "Review again".

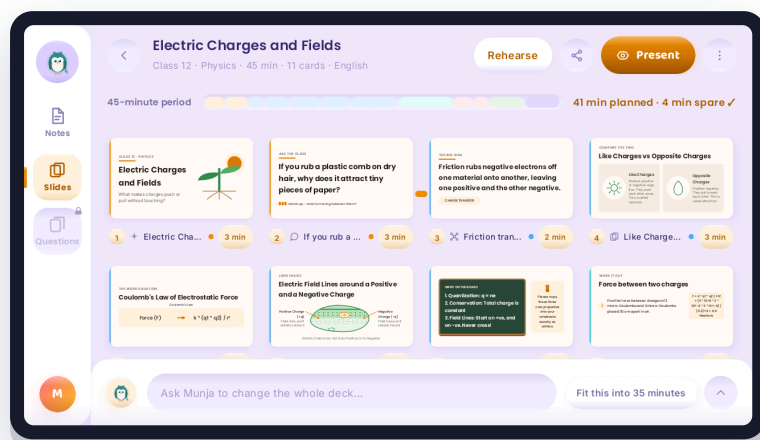

HUB

Turn any chapter into study material

In the HUB, the student types a topic and gets notes, a mind map or flash cards. Everything is kept in "My library", ready for revision before a test.

Less paperwork, more time for the class

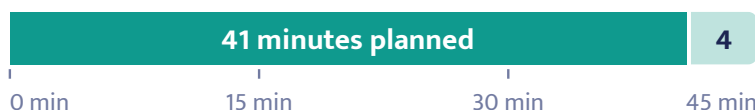

Munja AI prepares the daily material, so teachers can give more time to their students.

A real lesson made by Munja AI: Class 12 Physics, Electric Charges and Fields.

A complete lesson that fits the period

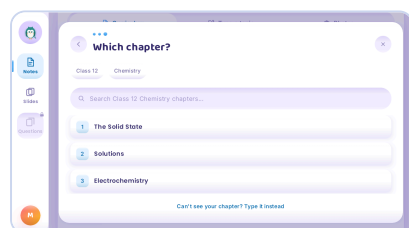

The same lesson: 11 cards for a 45-minute period, with 4 minutes left spare.

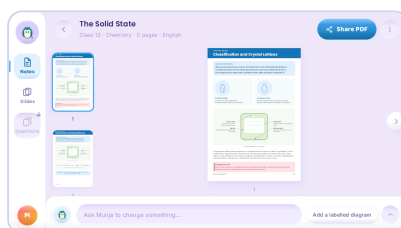

Five tools that save time every day

- Lecture Planning**
Plan lectures chapter by chapter from the syllabus.
- Notes Creation**
Choose the chapter and Munja AI writes the notes.
- PPT Presentation**
A presentation ready for the classroom, made to fit the period.
- Question Paper Generator**
Create question papers for tests and exams.
- Practice Paper Creation**
Create practice papers for students.

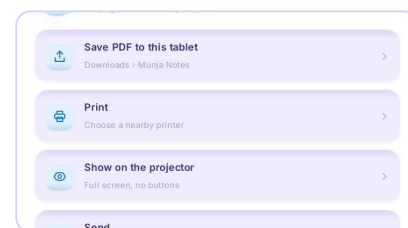

Ready notes in three simple steps

- Choose the chapter**
The syllabus is already inside. Or type a topic, or take a photo of the textbook page.

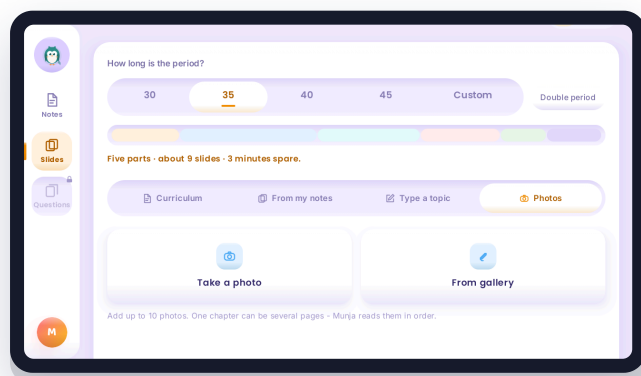

- Munja AI writes the notes**
Want a change? Just ask Munja AI and the notes are updated.

- Share them as a PDF**
Save, print, show on the projector or send to students.

The notes stay in the teacher's library, ready for the next class.

Rehearse, then present

- ✓ The teacher picks the period length: 30, 35, 40 or 45 minutes, or a custom time.
- ✓ Every card has teaching tips: what to ask, what to do and what to watch for.
- ✓ The lesson plan prints on A4.
- ✓ The lesson goes to the projector or TV for the class.

Safe for students, controlled by the school

Munja AI is built for study only.

Answers only from the syllabus

Not from the open internet. Students learn what the school teaches.

No distractions

The EduSoulX tablet has no social media, no games and no open internet.

The school controls privacy

Only the class and the question leave the tablet, never the name of the student.

Healthy daily limits

A daily usage limit for each student keeps study sessions calm. The school can set it.

How every question is handled

1. The student asks

A study question is typed on the tablet.

2. The class and subject are checked

Our server checks that the question is inside the syllabus of the student.

3. A calm reply

Inside the syllabus: a clear explanation. Outside it: a gentle return to syllabus topics.

web links in any answer

400+

automated safety tests

about 99.8%

accuracy in keeping to the syllabus, in tests

Figures from the Munja AI team's own tests. Munja AI is made to support teachers and textbooks, not to replace them.

The best way to use Munja AI is on the EduSoulX tablet

On a normal phone or tablet, a student is one tap away from games and social media. On the EduSoulX tablet, there is only study. Munja AI also runs on the student's own Android phone.

Three steps to Munja AI in your school

1

Book a free demo

We show Munja AI working on the EduSoulX tablet to your team.

2

Get your plan

We share the plan and the price for your number of students.

3

Setup and training

We set up the student and teacher logins and train your teachers.

See Munja AI working on the EduSoulX tablet

The demo is free, for your school or coaching class.
